

## EUROPEAN VOLUNTEERING IN A SPANISH ECOVILLAGE.

### EUROPEAN SOLIDARITY CORPS (ESC).

The Project Molino de Guadalmesí ([www.molinodeguadalmesi.com](http://www.molinodeguadalmesi.com)) is an ecovillage located in a 5-hectare plot of land in the Natural Park of the Strait of Gibraltar, Tarifa, Cádiz, Spain. We are located in a privileged area within a laurisilva forest on the banks of the Guadalmesí river, 800 meters from the Mediterranean coast. This privileged geographical situation offers views to the African continent from the mountain, a key point for birdwatching, thus making the place rich in biodiversity, a variety of ecosystems and biotopes.

The central activity of the project is the experimentation of a full one-year cycle in a sustainable group project learning from and inspired by the changes in nature. This activity is structured around an área.

The main one will be the permaculture garden and will be complemented with activities in other areas.

The annual tour will be structured according to the following cycles:

SOLAR CYCLE. THE FOUR SEASONS:

It will revolve around the garden and permaculture where, through theoretical and practical learning, the volunteers will integrate the different tasks to be carried out in the garden throughout the year and the basis for them, acquiring the skills and abilities to be self-sufficient at the end of the project.

LUNAR CYCLE. THE FOUR PHASES:  
PERSONAL PROJECTS.

Volunteers will have to carry out a personal project each month to choose in one of the areas: bio-construction, animals, food, outdoor design and leisure activities and connection.

These projects will be designed following the Dragon Dreaming methodology.

We are looking for at 4 young people aged between 18 and 30 from Denmark, Germany, France and Slovenia who want to live together for a full cycle of one year.

**From 21 March 2019 to 21 March 2020.**

Travel cost, accommodation and food are included + pocket money.

We will value the candidates' capacity for initiative and willingness to live together in a group, as well as their interest in learning how to use and develop a sustainable life.

Participants will be selected from among the candidates taking into account gender parity and age similar to be possible, as well as being in economic difficulties, geographical or refugee situation in Europe.

**If you are interested you can contact us as soon as possible in:**
